Technology Focus

Challenges

SIG sought to modernize communications with a focus on changing work dynamics

- Desire to create a more integrated and efficient communication ecosystem within MS Teams.
- Need to facilitate remote work and support employees working from various locations.
- Overcome limitations of legacy systems. IE. outdated technology/lack of scalability (Skype).
- Simplify administration and management through centralization.
- Respond to user demands for a unified communication and collaboration platform.

Use Case

SIG drives to deliver a better communication experience for its users

- Ensure adoption of new system & leverage capabilities effectively.
- Navigate intricate landscape of security & compliance requirements.
- Meet stringent SLAs to guarantee system performance & availability.
- Sustain high-quality call services for large user bases.

Key KPI's tracked:

- User adoption rates to reflect the extent that employees embrace the new system.
- System uptime and availability to monitor reliability.
- Collaboration and productivity.
- Support requests and downtime.
